

## Practical Halachah of Technology

### Internet with a Filter

**1.** If someone needs to use the internet, he is obligated **according to the letter of the law** to install a good filter. He must do so even if it costs money.

*(All of the prohibitions previously discussed and explained in the fundamental halachos apply to internet usage. This is especially true because all of the Gedolei Yisrael from all sects have ruled accordingly and we are obligated to obey them, as previously explained.)*

**2.** A “good” filter means the best filter that a person can install that will fit his needs. *(As explained in the laws of “darka acharina.”)*
