

Male and Female Coworkers

Note: In the upcoming emails we will discuss the *halachos* of *yichud* involving one man and one woman. Although we will mention potential *heteirim*, **it is important to clarify that even in the event that the *issur* of *yichud* does not apply, a man and woman should not work by themselves together on a regular basis without others present.**

Therefore, when an individual is seeking a job, he or she should look to work in an office setting that will not require a man and woman to be alone together regularly without any other workers present.
